

Application Questions for IT:

- 1) What type of application is it (Windows, Web, etc.).
- 2) If Web application, are there any browser plug-ins required (Silverlight, Adobe Reader, etc.).
- 3) If Web application, what browsers are supported.
- 4) What servers are involved in the solution (Windows 2008, Linux, Unix, etc.).
- 5) What development tools are used in the solution (.Net, Java, Adobe, Crystal Reports, etc.)
- 6) What RDBMS is used in the solution (Oracle, SQL Server, etc.)
- 7) How many tables are required by the application.
- 8) How is authentication (user login) and authorization handled (user roles).
- 9) Are there any scheduled processes (daily, weekly, etc.) that need to be run and what do they do?
